

# OCEAN OBS'19

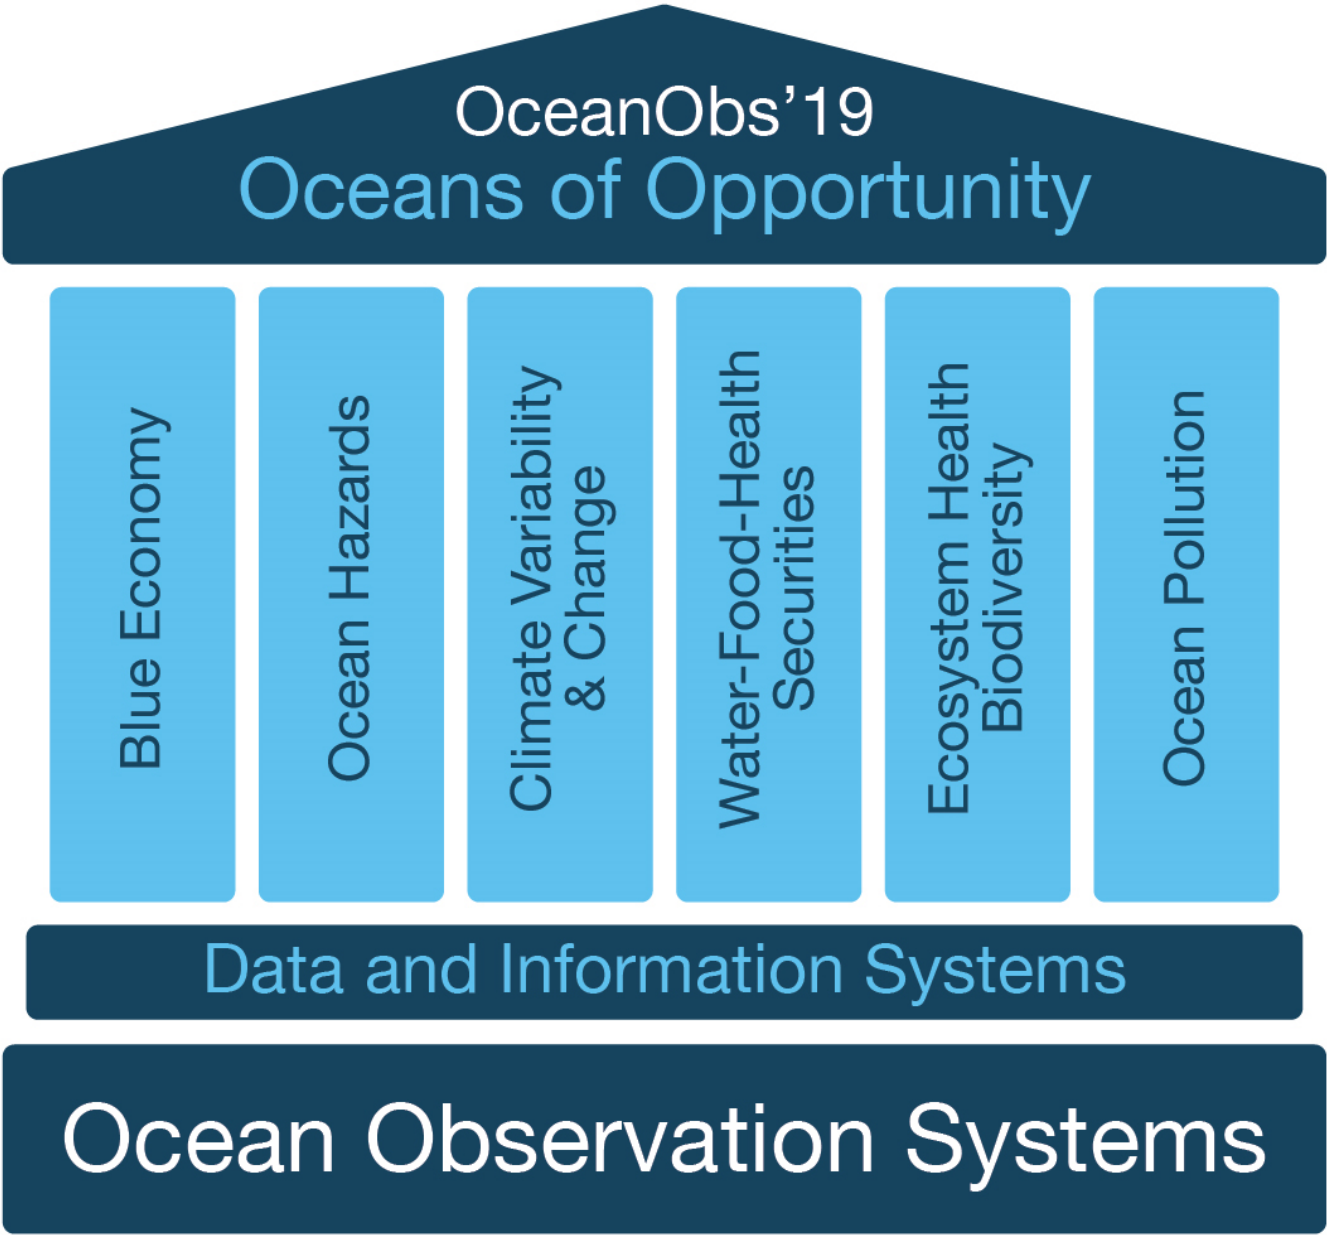

**Oceans of  
Opportunity**

# History of Ocean Observation Conference

- OceanObs '99 – France, ~300 participants, laid out basic ocean climate obs that we have today (drifter, floats, xbt, tide gauge...)
- OceanObs '09 – Venice, Italy, ~640 participants, expanding the community of sustained observation and the Framework for Ocean Observing.
- OceanObs'19 – Honolulu, USA, ~1200 participants. Connecting observers with end user community.

The diagram is structured like a classical building. At the top is a dark blue triangular pediment containing the event name. Below this are six light blue rectangular columns, each representing a thematic area. These columns sit on a dark blue horizontal base. Below the base is another dark blue horizontal bar. The entire structure is set against a white background with a decorative row of light blue dots at the bottom.

A horizontal row of 30 light blue dots at the bottom of the slide, arranged in two rows of 15 dots each.

## Framework for Ocean Observing Process Diagram

# What is done already?

- **Honolulu Convention Center (HCC)**
- **16-20 September 2019** (858 Days to go!)
  - Anchor Sponsor: NASA
  - Co-Sponsors: NSF, NOAA, ESA, GEO, GCOS, MERCATOR, and growing!
- Letter of intent signed with HCC on 12/30/16
- Signing bonus opens OceanObs'19 account!
- Option for side meetings around the conf.
- Site Review next week in Honolulu

# What's Next

- Build **Program Committee** (4-5 Community Co-Chairs) “The input to the conference.”
- Build **Local Organizing Committee** (U.Hawaii co-lead) “Executing the event.”
- Build **Sponsor Committee** (NASA co-lead) “Guiding the output from the conference.”
- Build web presence (oceanobs19.net)
- Staff support for committees – Distributed Project Office (UCAR, COL, WMO, IOC)
- Draft and publish first circular

# What is needed NOW?

- Appoint community co-chairs
  - Recruit energetic volunteers to committees
  - Engagement by observing system groups
  - Engaging user communities
  - Further mobilizing sponsors
  - Determining priority outcomes of the conference
  - Guidance for the all conference participants
- 
- **Send ideas to: [Eric.J.Lindstrom@NASA.Gov](mailto:Eric.J.Lindstrom@NASA.Gov)**

# Some ideas related to “Input”

- White paper fatigue recognized
- Externalize white paper review (use journal)
- Get structured input on observing system status & forward evolutions (10 yr) & user community engagement.
- Collect input on “requirements” with 10 yr plan & user engagement.

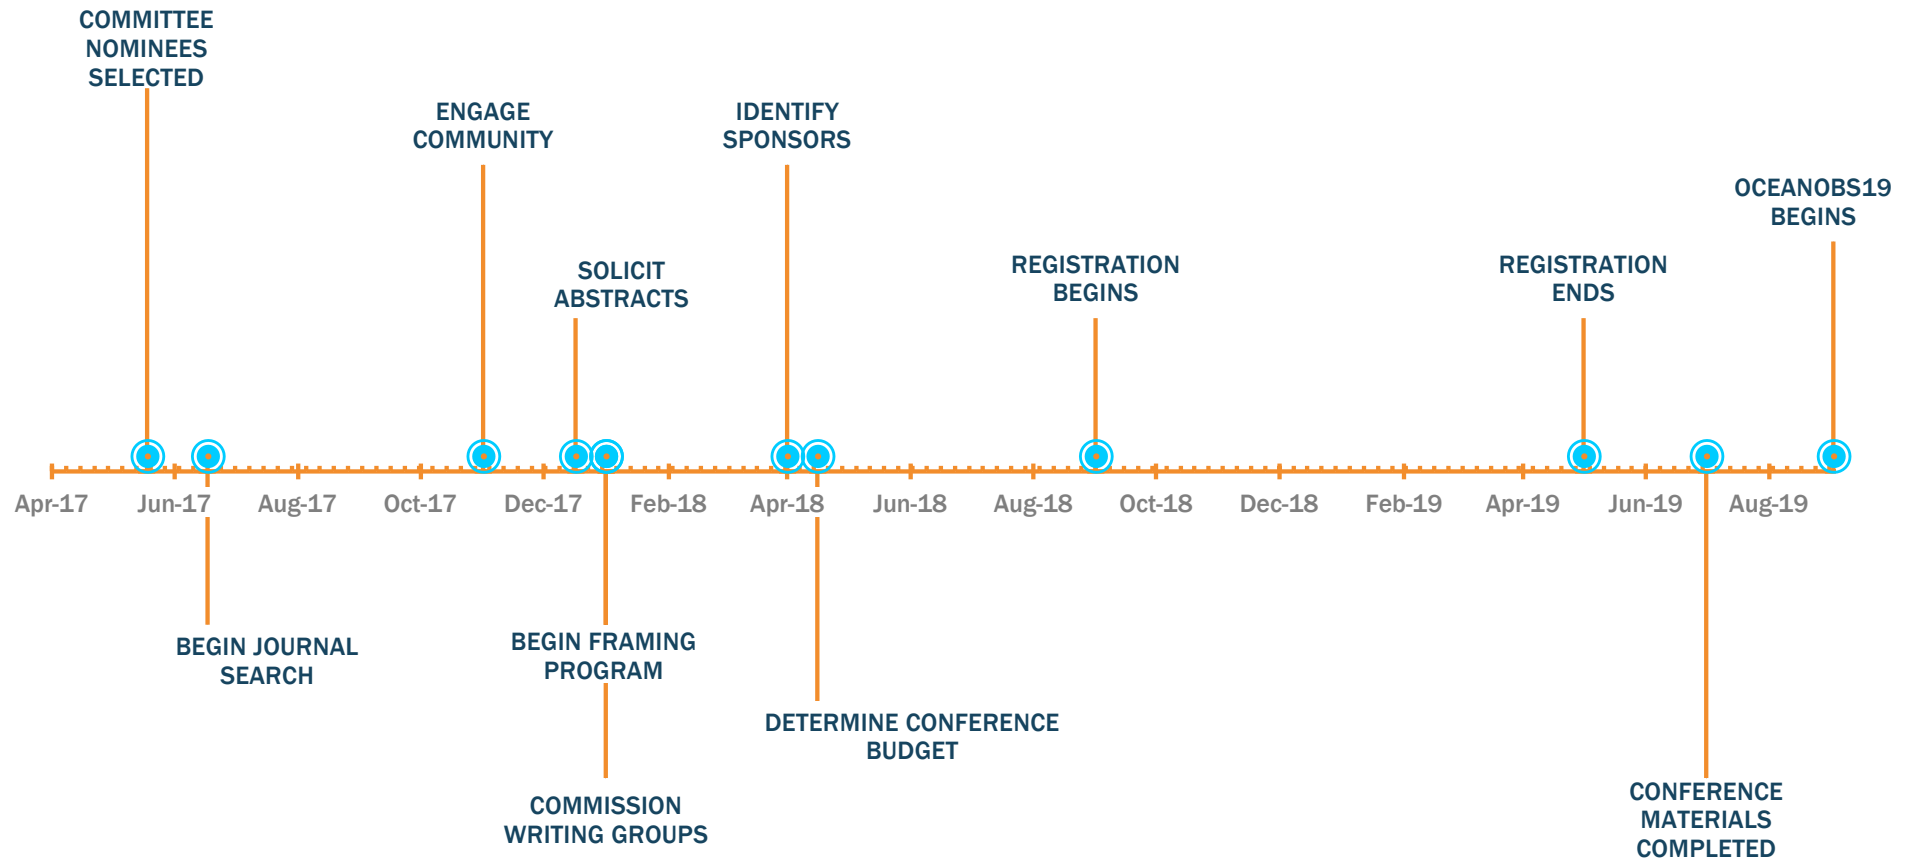

# Some ideas related to “output”

- Endorsement of approach for biological observations including metrics
- “Integration” moved from platform-based to EOV-based approach
- Deliver products by EOV
- Get requirements from industry/super users
- Sponsor developing country scientists

# OceanObs19 Conference Timeline

# Some Questions for NOAA OMD

- POC for each observing network?
- What information and outcome do you want from OceanObs'19?
- Provide to conference - links to key user communities.
- Provide to conference - links to key developing country scientists.
